Summary

Passionate Software Engineering student with strong experience leading academic software projects. Skilled in full-stack web development, version control using Git, and agile collaboration. Adept at applying Java and React.js to build scalable applications. Seeking opportunities to contribute innovative solutions in a software development team.

Experience

2024–Present **Team Leader – Software Engineering Projects**, *Helwan University*, Cairo, Egypt

- Led a team of 6 students to design and implement software projects using PHP, JavaScript, HTML, and Bootstrap.
- Coordinated project tasks, conducted code reviews, and managed version control with GitHub.
- Applied MVC architecture and ensured on-time delivery of project milestones.

Projects

- Around the World**
- Built a React-based country information explorer with features like search, region filter, and dark/light mode.
 - Utilized REST APIs to fetch country data, implemented responsive design with Tailwind CSS.
 - Managed state with React hooks and improved UI accessibility.
 - *GitHub*: github.com/DORMODO/around-the-world
